
Eltec Pyroelectric Sensors

Posted by telizotte - 2008/05/06 19:42

One of the best sources for pyroelectric sensors is a Florida company called Eltec Instruments. They sell standard off the shelf and custom designed sensors and sensor arrays.

These sensors can be equipped with a pinhole and scanned across the laser beam to create a 3D intensity profile using an O-scope or using a data acquisition system.
